

Topic: Probable exposure to COVID-19 pending further investigation.

November 8, 2020

Dear Ranger parents, staff and community members:

We were informed over the weekend that a high school student who was in attendance this past week became ill and also has a family member in the home that had tested positive for COVID-19. To ensure the safety of our students and staff and following the guidance of Van Buren/Cass County Health Department, all students and staff who were in contact with this student last week will be quarantined from school because the student exhibited some symptoms while in school. All who were in contact will be tentatively quarantined pending further investigation until November 18th and will be **allowed to return to school on November 19th**.

Please parents, if you know that someone in your home is sick, or your student is exhibiting any symptoms, no matter how slight, keep your student home! Your student can join the classroom instruction virtually and keep the rest of the students and staff safe from the potential spread of this virus.

As our country fights the spread of COVID-19, we believe one of our greatest responsibilities is to communicate transparently and often with you, our school community. It is our hope that accurate and up-to-date correspondence will help you make well-informed decisions for your family. Nothing is more important to us than the safety and health of our students, our employees and their families. When we work together, we can provide the best care for all involved.

Cassopolis Public Schools will continue to clean and disinfect surfaces inside all district schools, including the high school with possible exposure. As more cases are being confirmed across the state, it is important to remain vigilant. The CDC recommends the following best practices to help prevent the spread of this global pandemic:

- Wash your hands often with soap and water for at least 20 seconds.
- Use alcohol-based hand sanitizer with at least 60% alcohol if soap and water are not available.
- Avoid close contact with those who are sick.
- Cover your coughs and sneezes with a tissue or your sleeve.
- Avoid touching your eyes, mouth and nose.
- Disinfect frequently touched surfaces and objects.
- Stay at home, if possible.
- If you must go out, practice social distancing, leaving at least six feet between you and other people.
- Avoid gatherings that include more than 10 people.

The most common symptoms of COVID-19 include fever, cough and shortness of breath among other symptoms of illness or some have no symptoms. If you or any member of your family exhibit these symptoms, you are encouraged to contact your medical provider for advice immediately. Do not come to work or school until you are fever free for 3 days and it has been 10 days since you started feeling ill. Symptoms usually appear 2-14 days after exposure.

If you would like to learn more about COVID-19, the following links are reliable and accurate sources for information:

Our greatest priority is the safety of our students, staff and community members. Please continue to take necessary precautions to protect yourself and those around you.

We are grateful for the opportunity to serve you and your family, especially as we face this challenging situation together. Thank you for your support.

Sincerely,

Dr. A. Piazza

Superintendent

VBCDHD is working closely with our local medical community to address COVID-19

The Van Buren/Cass District Health Department is not currently testing at our location.

If an individual suspects they have COVID-19 symptoms, they should stay home and take one of the following steps:

- Call their primary care provider (PCP) via telephone
- Do a virtual visit with their health system/provider
- Contact one of the three **Care Advisor Phone Numbers or Web Pages** provided by our local health systems. *these numbers are helpful for individuals who do not have a PCP.
- **If your symptoms are life-threatening call 9-1-1*
